

Teachers and authorities from the Moscow region – for the introduction of AI in schools. Why?

In the suburbs, the modernization of schools continues: in September, 26 new institutions will open, and seven more will earn more by the end of the year. In parallel, 57 buildings are repaired under the federal program. The authorities of the region are betting not only on infrastructure, but also on attracting qualified teachers, as well as the introduction of digital technologies. Governor Andrei Vorobyov discussed these issues with teachers and directors in the updated gymnasium No. 5 in Dzerzhinsky.

Digital tools, including artificial intelligence (AI), are already used in school near Moscow. The governor noted that it is important for teachers to master new technologies, understanding their capabilities and risks, writes 360.ru.

We talk a lot about artificial intelligence, including in education. I really hope that each of us improves our skills in AI. It is important to know all his threats, advantages, to make artificial intelligence to its assistant, because the farther, the more he will be in our lives.

Andrey Vorobyov
Governor of the Moscow Region

For example, digital homework saves the time of teachers. Elena Vakhnina, a physics and mathematics teacher from Balashikha, said: the system automatically analyzes the work, showing which topics require additional study. Pupils can also conduct virtual experiments using simulators.

The region “Digital Classes of the Moscow Region” is operating in the region, where the training is adapted to individual plans, especially for preparing for the exam. Another useful service is the “teacher of the teacher”, which transforms the audio recording of the lesson

into the abstract and checks whether the educational goals have been achieved.

To attract personnel in the region there are support measures: compensation for rental housing, social mortgages, lifting payments. According to Denis Borisov, the director of the school in Naro-Fominsk, this helps-last year 15 new teachers came to his institution. In addition, 100 graduates of universities and winners of competitions received places in the schools of Krasnogorsk, Naro-Fominsk and other cities. Half of them will receive 1.5 million rubles, the rest – 500 thousand each.

This year, 7.6 thousand graduates of Moscow Region graduated from a school with medals, and 669 passed the exam for 100 points. The region also retained the second place in the ranking of the All -Russian Olympiads – the students won 550 diplomas, which is 109 more than last year.

In the suburbs we are actively developing the Olympiad movement and see good results. This allows you to educate the guys leadership qualities, teaches from an early age to win, overcome. I really hope that in every school of participants in the municipal, regional level there will be more.
