

The iPhone 17 Air, which Apple is preparing by September, had an unexpected competitor- the Nubia Air Android Smartphone from ZTE Nubia.

The leak showed a design similar to the iPhone 17 Air: a smooth rear panel, a tablet-shaped camera, the main sensor located on the left, and the flash on the right, is also the NFC chip located below. However, Nubia Air may not be just a copy, but by the revival of the last ZTE Grand S Flex project.

It is known that the Nubia Air will receive 6.78 "OLED-screen by a resolution of  $2720 \times 1224$  pixels, the budget chip Unisoc T8300, 8/256 GB of memory, triple camera 50, 0.8, 2 MP and selfie camer 20 megapixels, the battery of 5000 machers will be 6.7 mm, weight-172-172

At the same time, the front panel of the Nubia Air differs from the iPhone 17 Air: instead of a cutout or Dynamic Island, there will be a camera with a hole in the center and a fingers - shaped fingerprint scanner. Nothing is known about the characteristics and price, but it is expected that Nubia Air will be cheaper than the iPhone 17 Air, the starting price of which is \$ 899.
