

The S7 Airlines mobile application has returned to the App Store

The official S7 Airlines app, called “Travel Textbook” reappeared in the App Store store. IOS users on iOS can install it to plan trips and track flights.

Using the application, you can book a hotel, choose a car, purchase tickets for aeroexpress and order a transfer. Also, sales of air tickets are available through it, including the upcoming action on August 27-28.

All information about trips is stored in the “Travel” section. There you can also order additional services: select a place in the cabin, add baggage or order a special nutrition. Before departure, the application notifies the start of online registration.

For operational warning, the application can be associated with the Telegram account through the @s7assistant_bot chat boot. At the same time, the personal data of the passengers are not transmitted to the messenger.
