

Irina Yarovaya Vice Speaker Irina Yarovaya proposed creating a modern research center in Kamchatka, which will combine work in various fields of science. The initiative was announced during the Eastern Economic Forum (VEF) in Vladivostok.

According to Yarova, the unique natural conditions of Kamchatka make the peninsula with an ideal platform to create a multisystem scientific association. Such a center will coordinate disparate studies and achieve a synergistic effect.

The proposal was supported by the chairman of the Far Eastern Branch of the Russian Academy of Sciences Yuri Kulchin. According to the author of the idea, the creation of the center will be a breakthrough solution for the development of science in Russia.

Earlier it became known that eight Russian scientific organizations [They started](#) To the creation of the first national monitoring system of malicious flowering of algae. The project is coordinated by the Kamchatka State University named after Vitus Bering.
