

At the IFA 2025 exhibition, Acer has updated the Predator game device line. The main innovations were stationary computers Orion 7000 and Orion 5000.

**Predator Orion 7000** - The flagship of the series. It is equipped with the Intel Core Ultra 9 processor and the NVIDIA GeForce RTX 5090 video card. The PC supports up to 128 GB of DDR5 RAM and up to 6 TB SSD drives, as well as additional HDDs up to 4 TB. The water system is responsible for cooling. The case is made of glass and processed plastic, with an Argb light.

**Predator Orion 5000** - A more affordable model, but also powerful. The Intel Core Ultra 7 processor and the Nvidia GeForce RTX 5080 video card are used. The amount of memory and discs can also reach 128 GB of RAM and 6 TB of the total storage. Cooling - Cyclonex system and 120 mm fan.

Both models support modern communication standards: Wi-Fi 7, fast Ethernet and many USB ports.

New items will go on sale in Europe in the first quarter of 2026. The cost of Orion 7000 starts from € 3999, and Orion 5000 is from € 2999.
