

Bluefox introduced a compact 4.7 Smartphone with a screen of 90 Hz and an impressive battery for 3500 mAh

The Chinese brand Bluefox announced the release of a compact smartphone under the code name Bluefox  $\beta$ , which will be released in June 2026.

The novelty stands out unusually small for modern realities by dimensions - only 117  $\times$  54.6 mm and a 4.7 -inch diagonal screen.

The device will receive a 90-HC LCD display with a resolution of 1600  $\times$  720 pixels and the parties ratio of 20: 9. The maximum brightness will be 600 threads. The screen is made with a hole for the front camera.

The case is with a metal frame, the rear panel of matte AG glass. For unlocking, there is a fingerprint scanner on the lateral face.
