

In Russia, sales of the POCO C85 smartphone have started. The smartphone is equipped with a 6000 mAh battery, which is designed for one and a half to two days of work without recharging. Supported fast exercises with a capacity of 33 watts. The device operates on the Hyperos system and is equipped with a MediaTek Helio G81-Ultra processor.

The model received a 6.9 -inch diagonal screen with an update frequency of 120 Hz. This makes the interface more smooth and responsive. The camera includes the main module for 50 megapixels with artificial intelligence functions for handling pictures.

The device provides for two methods of unlock: the side scanner of fingerprints and the face recognition system. Among the additional functions are the support of two SIM cards, the presence of a NFC module for contactless payments and a standard 3.5 mm slit connector for headphones. Also available 4G, Wi-Fi and Bluetooth.

The smartphone is available in three colors: black, green and purple. The cost of the version with 6 GB of RAM and 128 GB of internal memory starts from 7772 rubles, taking into account all discounts. Configuration 8+256 GB will cost from 9282 rubles.
