

Google began release of September Safety Update for Pixel smartphones and Pixel Tablet tablets. It is available for Pixel 6 and newer models. The update brings corrections of many bugs and improve stability, albeit without new functions.

The main corrections and improvements include:

- **Audio:** Improving the quality of calls.
- **Battery:** Fixed the error of displaying the condition of the battery.
- **Biometrics:** Improved work of the print scanner.
- **Bluetooth:** increasing stability and performance.
- **Display:** The problem with the darkening of the screen is eliminated during the transition between the pages.
- **System and interface:** Fixed hoverings, launcher malfunctions, problems with the power button and gestures, errors when creating long screenshots and incorrect work of the home button, increased stability.
- **Connection:** Improved network stability and performance.

When the update becomes available to you, a notice will appear on the device, or you can check it manually through: settings> safety and confidentiality> system and update> safety update. The update file size may vary, on the Pixel 10 Pro XL it amounted to 73.09 MB.
