

Huawei introduced Matepad mini - the thinnest and lightest tablet in the world

Huawei introduced the new Matepad mini tablet, which the company calls the thinnest and lightest in the world.

Its thickness is only 5.1 millimeters, and weight is 255 grams, so that the device is easily placed in one hand.

The tablet received an 8.8-inch OLED display with a resolution of 2560 × 1600 points, an update frequency of 120 Hz and with a brightness of 1800 threads. The fraction of the screen on the front panel reaches 92%, and the frames around the display have a thickness of only 2.99 mm.

The case is made using titanium and high -strength steel, which made the device not only light, but also durable.
