

Nubia in October will present a new flagship game smartphone Red Magic 11. True, in China. According to the product manager, Dzhanga Chao, the model will receive seven major improvements.

Firstly, Red Magic 11 will be first protected from water with the IP68 rating. Improved cooling system: now an active fan is used that can cope with the high load of modern gaming processors. The smartphone will receive the latest Snapdragon 8 Elite Gen 5 platform with a clock frequency of up to 4.61 GHz.

The battery also became larger: 8,000 mAh is expected, which is more than 7,500 mAh of the last model Red Magic 10s Pro. For gamers, a new sensory control chip is installed, which will improve the response of the screen.

The Red Magic 11 screen will be “full -size”, without cutouts and holes for the camera. The design is made in the style of cyberpunk with 3D outlets and RGB backlighting.

In Geekbench tests, the NX809J model from the Red Magic 11 series showed 3309 points in the same mode and 10,742 in multi -core, which confirms powerful iron. The smartphone is equipped with 16 GB of RAM, Android 16 and 50 MP frontal camera under the screen.
