

The best children's doctors were awarded in the suburbs and discussed innovations in medicine

In the suburbs, the sixth congress of children's doctors "Pediatrics as Art" was held, which gathered specialists from 40 regions of Russia and 11 countries of the world. More than seven thousand doctors joined the event in remote format. Governor Andrei Vorobyov opened the event and presented regional awards to the best pediatricians of the region.

The governor emphasized that stopping in the development of medicine is unacceptable, especially when it comes to children's health. He noted the importance of the exchange of experience and the introduction of new methods in the practice of clinics and hospitals, writes 360.ru.

The congress has been held in the region since 2020 and has become a flagship event for the medical community. The awards were received by specialists from Dzerzhinsky, Shchelkov, Elektrostal, Privy and other municipalities. The governor noted the importance of the exchange of experience and the introduction of new methods in the practice of medical institutions.

Today in the suburbs there are over 2.6 thousand pediatricians. For them, support and advanced training programs apply. Experienced mentors help young specialists, a system of preventing professional burnout has also been introduced. From the beginning of the action of these measures, it was possible to adapt to work more than 300 doctors and reduce the lack of personnel. Additionally, doctors can count on a social mortgage, compensation for housing rental and awards for attracting new colleagues.

Particular attention is paid to the development of the state of obstetric care. Six perinatal centers and the Clinical Institute of Obstetrics and Gynecology Moniag work in the region. More than 70 thousand children are born here annually. For young parents, conditions have been created that allow you to receive medical care at the modern level.

Press Service of the Governor of the Moscow Region / Evgeny Pronin

Last year, the Roshal children's medical center opened in Krasnogorsk. Here they provide assistance in 28 areas, thousands of operations and consultations were carried out. On the basis of the Center there is a telemedicine department, which daily holds hundreds of online consultations. Recently, the branch of the institution began work in Romashkov, where pediatricians, therapists and doctors of other profiles conduct reception.

In recent years, the development of medical infrastructure has to reduce infant mortality in the region

The program of the current congress is designed for three days. Doctors are discussing clinical cases, rare diseases, dietetics, nursing and other areas. In addition, new medical equipment and digital services are presented at the forum sites that have already begun to use in the region.
