

The new 4K monitor Xiaomi A27ui was released in Europe for € 270

Xiaomi began the sale of a 27-inch A27UI 4K in Europe, starting with Germany. The price in the official store and for partners is € 270.

The monitor is equipped with an IPS panel with a resolution of 3840×2160 and HDR10 support. It covers 100% SRGB and 95% DCI-P3, displaying more than 1 billion colors with a depth of 10 bits. The panel has wide viewing angles of 178° and factory calibration with the accuracy of $\Delta E < 1$. The "coordination of colors" with other devices Xiaomi and Redmi is also supported.

For connection, there is a USB-C, which can also give up to 90 watts of power, for example, a laptop when the screen is turned off. A built-in USB hub allows you to connect a mouse, flash drives and other accessories without extra cables.

The monitor is certified by Tüv according to the standards of low blue light and is equipped with DC-playing, which reduces the load on the eyes during long work.

The stand supports adjustment in height, tilt, turn, there is a wall mount.
