

***In the new historical era, thanks to the positive initiatives of Hero Arkadag and the farsighted state policy of the Honorable President, the national science and education system of our country is being consistently improved in line with modern requirements. The use of new technologies that meet international standards, the integration of the latest scientific achievements, and innovative teaching methods ensure a high quality of education.***

As the Head of State emphasized, the most valuable wealth of all humanity throughout history is knowledge. Based on this, the Turkmen people have always attached special importance to science and education, making a worthy contribution to universal values. Relying on national experience and global achievements, state programs aimed at reforming the national education system are being successfully implemented. In particular, the goals set out in the “Concept for Improving the Methodology of Teaching General Education Programs in Turkmenistan until 2028” create broad opportunities for further development of teaching methods and the use of modern approaches.

The expansion of international relations requires the formation of youth who are fluent in foreign languages and skillfully use advanced technologies. In this regard, one of the key tasks is to improve schoolchildren’s proficiency in foreign languages, with new teaching methods being applied in language lessons.

Currently, wide opportunities are being created in our country for children and young people to receive modern education and to direct their talents and abilities toward creative activities. The content of textbooks and manuals is being enriched, while interactive multimedia tools and digital technologies are actively introduced into the learning process. Newly opened schools provide favorable conditions for effective learning, physical education, sports, and proper work of teachers.

We, teachers, respond to the comprehensive care shown to us with creative and dedicated work, striving to make a worthy contribution to the reforms carried out in our country through the efforts of Hero Arkadag and the Honorable President. May our National Leader and Arkadagly Hero Serdar, who provide all opportunities for educating the younger generation, remain healthy and safe!

**Shemshat GURBANBAYEVA,  
Deputy Director for Academic Affairs of Specialized Secondary School No.140 in  
Ashgabat, which provides advanced teaching of foreign languages, exact and  
natural sciences**
