

***The State Energy Institute of Turkmenistan invites students of higher education institutions from our country and abroad to take part in the 5th Open International Internet Olympiad in the discipline "Theoretical Mechanics."***

The Olympiad will be held from March 24 to March 28 in the format of individual and team competitions. Participant registration is open until March 15.

## **Conditions of the Olympiad**

- The Olympiad is open to all interested students, regardless of their field of study or year of education.
- Each higher education institution may nominate up to 10 students for the individual competition.

## **International Format**

The official working languages of the Olympiad are Turkmen, Russian, and English, ensuring its international status and broad accessibility.

## **Purpose**

The Olympiad aims to develop students' knowledge in theoretical mechanics, enhance their creative abilities, and promote international cooperation. The event is also regarded as an important step in strengthening scientific and educational collaboration between Turkmenistan's higher education institutions and foreign partners.
